Better than ever...

InfoKey™ controller

It's a key. It's an information center. It's an alarm device. And each wireless InfoKey controller is uniquely programmed to start and lock a specific Segway® PT. Slip your InfoKey controller into the dock on the LeanSteer frame, slip it in your pocket, wear it on your wrist or on a lanyard around your neck. Powered on, it provides real-time info on battery life, speed, and system performance. At your destination, it arms your Segway PT's built-in security features.

LeanSteer™ techno!

If Segway PTs were positively instinctive innovation know The LeanSteer and right in res inclination to le want to travel, the Segway PT is every move, and a slightest whim.
