SEED REGULATORY AND TESTING BRANCH RELOCATION UPDATE

The Seed Regulatory and Testing Branch (SRTB) facility in Gastonia, NC, will be open for operation April 21, 2003. The Beltsville office will not receive seed samples after that time; please send samples to the Gastonia address. You may experience somewhat of a delay in testing until the Gastonia facility is fully operational. Reserve Seed Collection requests should be marked, "Attn: RSC Coordinator" and sent to the Gastonia address. The mailing address is 801 Summit Crossing Place, Suite C, Gastonia, NC 28054-2193; telephone (704) 810-8870, fax number for the Regulatory Section (704) 852-4109; fax number for the Testing Section (704) 852-4189. Jonathan Farmer, Steve Hurst, and Harold Laswell can still be reached at (301) 504-9430 until May 30.

Al Burgoon will remain a member of SRTB continuing the trueness-to-variety and the variety name clearance programs. Al will be located in Maryland at the Plant Variety Protection Office (PVPO), 10301 Baltimore Avenue, Room 401, National Agricultural Library Building, Beltsville, MD 20705; telephone (301) 504-5518; fax (301) 504-5291.

Jonathan Farmer, Steve Hurst, Harold Laswell, and Leigh Wiltison will not be relocating to North Carolina. Jonathan will continue working with our agency program office in Washington, DC, at least until September 30. Steve and Harold will be retiring from SRTB at the end of May. Leigh accepted a position at PVPO.

The staff members who are relocating to Gastonia are Chief Richard Payne, David Bitzel, Susan Haney, Jeri Irwin, Pattsy Jackson, Susan Maxon, and Linda Vanderhoof. We will keep you informed as new contact information becomes available. The e-mail addresses of everyone staying with the agency will remain the same.

For information regarding this article contact Chief Richard Payne (704) 810-8870; (richard.payne2@usda.gov).

QUESTIONS AND ANSWERS

"Certified Organic" – What does it mean?

Use of the term "certified organic" for seed labeling does not mean that it is being labeled or advertised as a "class of certified seed," or certified for varietal purity. Also it is not in conflict with the definition of "Certified seed" in the Federal Seed Act regulations. There are many programs throughout the United States, not necessarily seed production, that are "certified" in some way, by some organization, or use that term.

To be labeled or advertised as "certified organic," according to USDA's National Organic Standards (7CFR Part 205), any production or handling operation that produces or handles agricultural products for sale as organically produced must be certified by a USDA accredited certifying agent. In addition, such operations must also adhere to the National Organic Standard's provisions for labeling and marketing organically produced products.

According to Section 205.303(b)(2) of the National Organic Standards, for any product (including seed) labeled as "100 percent organic" or "organic," its package must provide on the information panel (1) the name of the handler or distributor of the product, and (2) the name of the certifying agent preceded by the statement, "Certified organic by __," or a similar phrase.

In some states the official seed certifying agency in that state has received USDA accreditation and is the "certifying agent" for certified organic seed products. Barbara Robinson, Deputy Administrator for AMS, Transportation and Marketing Programs at (202) 690-1300 is the person to contact about any questions concerning National Organic Standard's provisions for labeling.

Can I Extend the Protection Rights for a Variety Name Through a Trademark?

The short answer is no. The U.S. Patent and Trademark Office (USPTO) has recently issued a trademark for the mark "K 326," for tobacco seed, seedlings, etc. The Plant Variety Protection (PVP) certificate (Registration No. 2666400) for the 'K326' variety of tobacco seed, previously protected under Title V of the Federal Seed Act (FSA), expired on March 26, 2002. We have consulted with officials at the USPTO and hopefully no more trademarks will be issued on terms that are variety names.

Please Note:

It is the opinion of the U.S. Department of Agriculture's Office of General Counsel that when a PVP certificate expires (1) "that sale is no longer restricted" and (2) "the date of harvest is immaterial for FSA enforcement." All requirements, rights and privileges under Title V of the FSA afforded to the owner of that certificate also become null and void. This allows seed of a variety with an expired PVP certificate to be sold by variety name without being a class of certified seed. After the certificate expires there are no restrictions on production, storage, or sale of the variety.

If a Variety Name Has Been Trademarked, Can I Advertise and Sell Seed of that Variety by Variety Name?

The short answer is yes. Section 201.34 of the Federal Seed Act (FSA) regulations specifies that a variety name is the name given when the variety is first introduced into channels of commerce (including advertisements) whether or not it was given by the originator of the variety or some other person. Once a variety name has been used or introduced into channels of commerce (including advertisements) the name becomes public property and any trademark privileges become null and void as to using the "mark" as a variety name. There can be no monopoly on a variety name when the term is public domain. Section 201.34(d)(4) of the FSA regulations, states: "The status under the FSA of a variety name is not modified by the registration of such name as a trademark."

Simply stated, it is a violation of the FSA to associate a trademark symbol ("®" or "™") on a label with a variety name or to directly or indirectly associate it with a variety name, or terms contained within a variety name, in an advertisement. To do so is considered false and misleading under the FSA.

In addition to being false and misleading, claims of exclusive rights to a variety name can lead seedsmen to want to change the name to a new (false) name. Any person changing or substituting another name for a variety would result in additional violations of the FSA. The Seed Regulatory and Testing Branch would appreciate being notified when any company/person attempts to prevent any seed being advertised or sold by variety name when the variety name, or terms within the variety name, have been issued a trademark.

For information regarding this article contact Seed Marketing Specialist Harold Laswell (301) 504-9430; (harold.laswell@usda.gov).

SEED INSPECTOR WORKSHOP IN GEORGIA

On March 12, 2003, Seed Regulatory and Testing Branch Chief Richard Payne and Seed Marketing Specialist Harold Laswell conducted a half day multi-state Seed Inspector Workshop. Dr. Wayne Guerke, Director of the Seed Division, and his staff hosted the meeting. Ten inspectors and laboratory personnel from Georgia and 12 inspectors or other State personnel from Florida met at the Tifton, GA, laboratory facility for the session.

The purpose of the training was to teach the State inspectors what they should look for and the recommended steps needed in sampling seed to insure that policies and procedures outlined in the Federal Seed Act (FSA) are followed. The work done by the inspectors under the Federal-State Cooperative Agreements results in FSA cases being made up on those interstate shipments found to be mislabeled. This training helps inspectors under this agreement to meet the requirements to acquire an official Federal Inspector Authorization Card.

Topics that were covered included benefits of the Federal-State Cooperative Agreement, sampling techniques and procedures, approved sampling equipment use, Plant Variety Protection under Title V, and labeling required by the FSA. Inspectors were reminded that the expertise and professionalism they use to acquire an official sample is critical to the Federal action that can be taken on a complaint.

For information regarding this article contact Seed Marketing Specialist Harold Laswell (301) 504-9430; (harold.laswell@usda.gov).

FEDERAL SEED ACT CASES SETTLED

The following cases were settled administratively under the Federal Seed Act between January 1 and March 31, 2003. Under the administrative settlement procedure, the Seed Regulatory and Testing Branch and the firms agreed to settle the cases for the amount specified, with the firms neither admitting nor denying the charges:

- W. Atlee Burpee Company, Warminster, PA, has paid \$2,250 for a case involving nine seed shipments. The alleged violations for all shipments was failure to properly label vegetable seed germinating "less-than-standard." Seed regulatory officials in Maryland and Texas cooperated in the initial sampling and inspection.

- Missouri Southern Seed Corporation, Rolla, MO, has paid \$6,650 for a case involving eight shipments. The alleged violations, while not the same for all shipments, were false labeling as to purity, noxious-weed seeds, germination percentage, and being a "lot of seed"; shipping seed containing noxious-weed seed in excess of state's limits; failure to show the presence of each noxious-weed seed; failure to show the required variety labeling for component seed lots in a mixture; failure to test for germination within the prescribed period prior to interstate shipment; and failure to keep required records. Seed regulatory officials in Illinois cooperated in the initial sampling and inspection.
- Smith Seed Services, Halsey, OR, has paid \$6,475 for a case involving 14 shipments. The alleged violations, while not the same for all shipments, were false labeling as to purity, germination percentage, test date, variety name, the presence of noxious-weed seed, and to being a "lot of seed"; failure to label the rate of occurrence of noxious-weed seed, and kind name; shipping seed with noxious-weed seed in excess of state's limits; and failure to keep required records. Seed regulatory officials in Georgia, Kentucky, Maryland, Missouri, Nebraska, Tennessee, and Virginia cooperated in the initial sampling and inspection.

RYEGRASS FLUORESCENCE LIST

The current ryegrass fluorescence list by the National Grass Variety Review Board (NGVRB) can now be accessed on the following Web site:

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
