SUPPLEMENTARY INFORMATION: Section 2119 (7 U.S.C. 6518) of the Organic Foods Production Act of 1990 (OFPA), as amended (7 U.S.C. 6501 *et seq.*) requires the establishment of the NOSB. The purpose of the NOSB is to make recommendations about whether a substance should be allowed or prohibited in organic production or handling, to assist in the development of standards for substances to be used in organic production, and to advise the Secretary on other aspects of the implementation of the OFPA. The NOSB met for the first time in Washington, DC, in March 1992, and currently has six subcommittees working on various aspects of the

organic program. The committees are: Compliance, Accreditation, and Certification; Crops; Handling; Livestock; Materials; and Policy Development.

In August of 1994, the NOSB provided its initial recommendations for the NOP to the Secretary of Agriculture. Since that time, the NOSB has submitted 239 addenda to its recommendations and reviewed more than 361 substances for inclusion on the National List of Allowed and Prohibited Substances. The Department of Agriculture (USDA) published its final National Organic Program regulation in the **Federal Register** on December 21, 2000, (65 FR 80548). The rule became effective April 21, 2001.

In addition, the OFPA authorizes the National List of Allowed and Prohibited Substances and provides that no allowed or prohibited substance would remain on the National List for a period exceeding five years unless the exemption or prohibition is reviewed and recommended for renewal by the NOSB and adopted by the Secretary of Agriculture. This expiration is commonly referred to as sunset of the National List. The National List appears at 7 CFR part 205, subpart G.

The principal purpose of NOSB meetings is to provide an opportunity for the organic community to weigh in on proposed NOSB recommendations and discussion items. These meetings also allow the NOSB to receive updates from the USDA/NOP on issues pertaining to organic agriculture.

Summary of October 2010 Meeting

At the fall 2010 meeting in Madison, Wisconsin, the NOSB voted to renew 56 materials listings that were scheduled to sunset in 2012 (see Table 1). A combined 28 substances were deferred by the Crops and Handling Committees until the Spring 2011 NOSB meeting in Seattle, Washington.
