Fresh Fruit and Vegetable Shipments

By Commodities, States, and Months

PREFACE

This summary publishes domestic rail and piggyback shipments, available truck and air shipments and exports of fresh fruits and vegetables by commodities, modes of transportation, origins, and months. Available domestic boat shipments from U.S. possessions and imports from foreign countries are also shown. All amounts are shown in units of 1,000 hundredweight.

Rail and piggyback shipments were reported by rail carriers that issue the initial line-haul revenue waybills. Rail shipments are those moving in refrigerated railcars. Piggyback shipments include those moving in trailer-on-flat-car and container-on-flat-car service.

Truck and air shipments and exports for all commodities and origins are not available. Those obtainable are reported but should not be interpreted as representing complete movements. Truck, air and boat shipments and exports from all states are collected at shipping points and include both inter and intrastate movements. They are obtained from various sources, including Federal marketing order administrative committees, Federal State inspection service, shippers and transportation agencies.

Data on imports from foreign countries, except Mexico, were obtained from official records of the U.S. Department of Commerce. Mexico data are border crossings secured from records of the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture. Crossings from Mexico may include some transshipments to other countries. Transshipments may reach material levels during the Mexican winter shipping season. Transshipment figures can be determined from the

final monthly Customs report.

A commodity classification table is shown on page 5. Major items are specifically identified, while minor commodities are grouped together and classified under an appropriate commodity heading. A table of net weights for the most commonly used containers for major commodities is shown on page 6. Container net weights for other commodities shown in this summary, as well as factors used to convert railcars and piggyback vans to weight units, are available upon request.

Tables of total reported domestic shipments, exports and imports by commodities, months and modes of transportation are shown on pages 7-10. By origins, months and modes of transportation on pages 11-13.

California shipments are listed by district, e.g., Northern-Calif North, Central-Calif Cent, Southern-Calif South, and Imperial Valley-Calif Imp Vly.

Cooperation of railroad, air, and steamship agents, members of the produce industry and officials of State Departments of Agriculture, farmers' markets and the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture is gratefully acknowledged.
